# Integral Foam System

## The ideal material for your ideas

Integral foam is a highly elastic, foamed polyurethane material available in apparent densities of 300 - 650 kg/m<sup>3</sup>.

It features a closed outer skin and a core with an open cellular structure resulting in a very good damping behaviour.

### Key benefits

- Abrasion-resistant, highly elastic outer skin
- Comfortable, soft, fine-pored core
- Tear-resistant and elastic, even at low temperatures
- Highly weather-resistant
- Extremely versatile due to different densities
- Highly accurate representation of surfaces
- Can be combined with other materials
- Very fine foam structure

### Fields of application

- Leisure industry
- Mechanical engineering
- Building industry
- Furniture industry
- Your industry - for your ideas
